

ASP-FIBRS1

ASP-FIBRS1 Fiber HDMI Extender offers an easy way to extend full HD HDMI signal to 300 meters away over a single core fiber. The conveyed video is uncompressed to ensure the best video and audio quality. The ASP-FIBRS1 also supports RS-232 which can transmit and receive serial data between a controller and display (ex. flat screen display or projector). In addition, IR can also be sent from the destination back to the source for use with IR remote controls. Cooperating with video switch or video distributor, the ASP-FIBRS1 fits best for public display, digital signage and home entertainment applications.

Video Output	
Bandwidth	Single-link 225MHz [6.75Gbps]
Resolution	480i / 480p / 720p / 1080i / 1080p60
Connectors	Type A [19-pin female], DB-9 Serial Port, 3.5mm IR connector
Power	
Power Supply	5V DC
Power Consumption	1 Watt
Physical	
Dimensions	130 x 107 x 28mm [5.12" x 4.21" x 1.1]
Weight	350g [11oz]
