

NXT-700

Aurora Multimedia introduces the new hybrid NXT-700 touch panel in-wall controller. The NXT-700 is a revolutionary development that integrates a control system processor with multiple ports into a Web-based touch screen controller. The extremely versatile hybrid combines a spectacular 7-inch widescreen touch panel display with a fully loaded 32-bit 900-MIPS WACI engine. As a registered Bluetooth adopter, Aurora has added a Bluetooth microphone option into the NXT-700 for voice-lift applications. The hybrid can utilize other common Bluetooth accessories, and includes an internal audio mixer to complete the solution.

General Specifications	
Processor	900MIPS
Memory	256MB Flash, 128MB DDR2
Maximum	Flash 16GB
IR Learner	(1) IR receiver window on front panel
Front Bezel	Aluminum
Display	
Physical	7" LCD Panel
Resolution	800x480 (16:9 aspect ratio)
Touch Screen	4 wire resistive touch surface
Brightness	300 nits (cd/m2)
Viewing Angle	±70° horizontal, +70°/-60° vertical
Ports	
Serial	(2) RS-232/422/485
IR	(2) Outputs
Relays	(2) C-Type
I/O	(2) I/O's
LAN	(2) 10/100 LAN Auto MDX (Port 1 is POE capable)
Audio	(1) Stereo Line In (1) Stereo Line Out (1) Front panel speaker (1) Front panel microphone
Expansion Ports	(1) USB 2.0 Host (1) Micro SD
Physical	
Power	12V DC 9 Watts
Dimensions	8.51" x 6.67" x 1.8" (21.61 x 16.94 x 4.57 cm)
