

## PAD12-LRM

PAD12-LRM is a very special and unique button panel. The PAD12-LRM fits in a 1RU rack space and provides a comfortable, tactile and graphical user experience. The buttons use tiny display technology to provide multiple levels of interaction using accompanying software. Each button has the ability to morph into other buttons based on button presses or events taking place in the system. In addition, there is a built-in web server for remote IP control. With the built-in IR and Serial ports, the PAD12-LRM is the most innovative and functional control interface in the industry today.
