

WACI PAD 6L

WACI-PAD is a very special and unique button panel. The WACI-PAD fits in a single gang electrical box and provides a comfortable, tactile and graphical user experience. The buttons use tiny display technology to provide multiple levels of interaction using accompanying software. Each button has the ability to morph into other buttons based on button presses or events taking place in the system. In addition, there is a built-in web server for remote IP control. With the built-in IR and Serial ports, the WACI PAD is the most innovative and functional control interface in the industry today.
