The new PN42C430 is Samsung's best value PDP flat panel HDTV that features an attractive "piano key black" cabinet, our 600Hz subfield motion technology, 2 advanced HDMI inputs that feature our Anynet+™ (CEC standard) technology making system control of your DVD or Blu-ray™ disc player a one-touch operation. New for 2010, all Samsung's plasmas feature our new E³-panel single filter design that delivers improved performance, meets the ENERGY STAR® power consumption specifications, and eliminates off-angle blur making the sharpest of details like scrolling text easier to see and read. Experience the performance of Samsung's new 42" plasma HDTV that's both easy on the wallet and the environment.
