

PLC-UF15

UXGA Digital Multimedia Projector

REALISTIC COLOR REPRODUCTION

The PLC-UF15 utilizes a newly developed 6500°K color temperature optical system for more realistic color reproduction. This color-focused design is suitable for digital cinema applications

INCREDIBLY BRIGHT 7700 ANSI LUMENS

Utilizing four high-output 250 watt UHP lamps as its light source, the PLC-UF15 delivers an incredible 7700 ANSI lumens of brightness.

OUTSTANDING CONTRAST RATIO – 1000:1

Through its new high-contrast optical system the PLC-UF15 is able to achieve an outstanding contrast ratio of 1000:1.

SANYO's NEW PROGRESSIVE IC

A newly developed progressive integrated circuit provides highly improved playback of moving images. 1080 interlaced signals are converted into progressive signals while 2-3 pulldown doubles the resolution of images from DVD playback.

NETWORK CONTROL/ADMINISTRATION

An optional network board allows for simple control and management of the projector via a CAT5 network connection. The network board, which can memorize and store up to 55 PC modes, can also be used in parallel with RS-232 controllers.

REAL COLOR MANAGER

The Real Color Manager System provides white balance adjustment and gamma correction from a PC using the included image adjustment software by simply comparing the on-screen image to a printed color chart.

NEW ONE-TOUCH LENS REPLACEMENT

Attaching the included One-Touch lens mount adapters to your projector and lenses makes installation and removal of our optional lenses quick and easy.
